Summary

Software engineer with **over four years** shipping production web applications in **TypeScript** and **React**, with backend work in **Node** and **Java (Spring)**. I **own delivery end to end**, from the component to the **Kubernetes** release, and use **Claude Code** daily to build, refactor and validate code.

Work Experience

Mid-Level Frontend Developer, *GMV* 10/2023 – Present | Madrid, Spain
Contributed to the development and delivery of web applications to meet ESA's needs in the Galileo project. Galileo is Europe's global satellite navigation system.

- Developed and maintained **5+** frontend applications using **React, TypeScript,** and **CSS,** improving usability and consistency across Galileo applications.
- Volunteered to lead the team's move to **Kubernetes** when nobody else took it on: learned Kubernetes, **Kustomize** and **Helm**, then moved our **Dockerized** apps to Helm releases across **2 environments**, reducing manual steps.
- Automated monthly deployments of applications across environments using **Jenkins.**
- Contributed to backend services using **Node** and **Java** (Spring).
- Engaged in **Agile** events (stand-ups, planning, retrospectives) and defined project needs and user stories
- Worked with ESA engineers to clarify requirements, gather feedback, and translate operational needs into user stories and features.
- Improved maintainability through **code reviews, pair programming, refactoring,** and **clean code principles.**

Technologies: React, TS, CSS, Node, PostgreSQL, Docker, K8S, Helm, AWS, Jenkins, Claude Code, Git, Scrum

Junior Full Stack Developer, *Seanchas Research* 04/2023 – 07/2023 | Cork, Ireland
Very enriching Erasmus+ experience working full-time in English in Ireland.

- Developed and updated 2 web applications: one full-stack application using **Angular, TypeScript, CSS, Java,** and **MySQL,** and one **WordPress**-based website.
- Used Git and GitHub Actions to support version control and deployment workflows

Technologies: Angular, TypeScript, CSS, Playwright, Java, MySQL, WordPress, Git, GitHub Actions

Capgemini

> **Junior Full Stack Developer** 07/2022 – 04/2023 | Murcia, Spain
> - Developed web applications for ADIF railway infrastructure systems, supporting services related to Renfe trains and national rail operations using **Angular, TypeScript, CSS** and **Java** (Spring).
> - Built responsive interfaces from **Figma** designs and client requirements, aligning frontend implementation with business and usability needs.
>
> **Full Stack Developer Intern** 04/2022 – 07/2022 | Murcia, Spain
> - Started with **Angular** and **Java.** Three months as intern, then hired.
>
> *Technologies*: Angular, TypeScript, CSS, Java (Spring), PostgreSQL, Git, Figma, Scrum
