ABOUT MYSELF

4 years building scalable and maintainable software. I enjoy everything related to software and the people who create it. I strongly advocate for **clean code** and **agile practices**. I am ambitious and able to learn quickly.

WORK EXPERIENCE

10/2023 – Present
Madrid, Spain

Mid Frontend Developer, *GMV*
Contributed to the development and delivery of web applications to meet ESA's needs in the Galileo project. Galileo is Europe's global satellite navigation system.

- Developed and maintained **5+** frontend applications using **React**, **TypeScript**, and **CSS**, improving usability and consistency across Galileo applications.
- Built and deployed containerized applications across **2 Kubernetes environments** using **Docker**, **Helm, and Kustomize**, reducing manual deployment steps by moving configuration values into Helm.
- Automated monthly deployments of applications across environments using **Jenkins**.
- Contributed to backend services using **Node** and **Java** (Spring).
- Engaged in **Agile** events (stand-ups, planning, retrospectives) and defined project needs and user stories
- Worked with ESA engineers to clarify requirements, gather feedback, and translate operational needs into user stories and features.
- Improved maintainability through **code reviews, pair programming, refactoring and clean code principles**.

Tech: React, TS, CSS; Node, PostgreSQL; Docker, K8s, Helm, AWS, Jenkins; Git. Scrum.

04/2023 – 07/2023
Cork, Ireland

Junior Full Stack Developer (Erasmus Internship), *Seanchas Research*
Very enriching experience working full time in English and in another country. Responsible for developing and updating web applications. Tech: Angular, TypeScript, CSS; Java, MySQL. Wordpress. Git, Github Actions.

04/2022 – 04/2023
Murcia, Spain

Junior Full Stack Developer, *Capgemini*
Developed web applications using **Angular** and **Java (Spring)**, collaborating in Agile teams to deliver clean, responsive solutions that satisfy the client's demands. Tech: Angular, TypeScript, CSS; Java (Spring), PostgreSQL. Git. Figma. Scrum.

Projects

AquaMesh , *No-code platform for creating interactive dashboards. Built with React, Turborepo and microfrontends*

DevOps Lab , *Complete DevOps pipeline with Docker, Kubernetes, AWS, and CI/CD automation*

Particle Universe , *Multi-framework Astro dashboard renders interactive simulations with React, Vue and Angular*

EDUCATION AND TRAINING

2022 – 2023

Higher Technician in Development of Web Applications, *CIFP CARLOS III*
I learned: **PHP**, specifically the **Laravel** framework; and **Angular**.

2020 – 2022

Higher Technician in Development of Cross-platform Applications, *I.E.S Chirinos*
I learned: application development using **C#**, and **Python**. **HTML**, **CSS** and **JS** for web. **Java** for **Android**. **SQL** and **noSQL** databases.

LANGUAGE SKILLS

- Spanish (Native)
- English (C1 Cambridge)
- French (B1)
